Professional Summary

Frontend Developer skilled in MERN Stack and UI/UX, expanding into backend and AI/ML. Passionate about exploring emerging tech and AI tools to create innovative solutions.

Education

BSc in Information Technology (CGPI: 8.69)

Darshan University | Rajkot-Morbi Hwy, Gujarat | May 2025

Expected Graduation

Certifications

ChatGPT Prompt Engineering for Developers - DeepLearning • August 2024

Communication, Team Work, Quick Learner, Guide

Programming: Python, JavaScript, HTML/CSS, SQL, Node.js, React.js

Tools: Android Studio (Flutter), Sublime, Visual Studio, Anaconda (Python), Git, Bootstrap, Tailwinds CSS, Agile, Jeera, Postman, ChatGPT (Prompt Engineering), VMWare, Microsoft Excel

Projects

Live E-Commerce Project – Divinetech Solutions (Internship)

Completed: 6 Months

- Role: Frontend Developer | Duration: 6 Months (Tools: React.js, JavaScript, node.js, Figma, MongoDB)
- Created responsive UIs on product, cart, and checkout pages using React.js. Collaborated on UI/UX using Figma, integrated the frontend with the backend, fixed bugs, and developed feature analysis for scalable modules.

Interior Design Web Application | Next.js, React, TypeScript, Tailwind CSS

- Developed a responsive interior design web application with Next.js (App Router), React, and TypeScript for high performance.
- Architected a scalable, component-driven frontend, isolating reusable UI elements and custom hooks to boost maintainability.

E-Commerce Platform | React Frontend Project

- Built a dynamic e-commerce frontend with React.js, JavaScript, and CSS for seamless browsing and interaction.
- Built a scalable frontend using Create React App, optimizing the folder structure for future API and payment integrations.

AI/ML Model Creation Ongoing

- Developing predictive models with focus on data analysis, training, and performance optimization.
